## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3, 14, drawn to a method of neutralizing the anticoagulant effect of heparin by administering a BPI protein product, classified in class 514, subclass 12.
- II. Claims 2, 4, 14, 15, 16, drawn to a method of inhibiting angiogenesis by administering a BPI protein product, classified in class 514, subclass 12.
- III. Claims 5, 14, 17, 22, drawn to a method of inhibiting endothelial cell proliferation by administering a BPI protein product, classified in class 514, subclass 12.
- IV. Claims 6, 14, 18, drawn to a method of treating endometriosis by administering a BPI protein product, classified in class 514, subclass 12.
- V. Claims 7, 14, 19, drawn to a method of contraception by administering a BPI protein product, classified in class 514, subclass 12.
- VI. Claims 8, 9, 14, 20, 21, drawn to a method of inhibiting tumor cell proliferation by administering a BPI protein product, classified in class 514, subclass 12.
- VII. Claims 10-13, 14, drawn to a method of treating chronic inflammation by administering a BPI protein product, classified in class 514, subclass 12.

The inventions are distinct, each from the other because of the following reasons:

The following pairwise combinations of methods are independent and distinct, wherein each member of a pair performs different functions, using different starting materials and or

Art Unit: 1647

process steps and/or with different outcomes: I and each of II-VII; II and each of III-VII; III and each of IV-VII; IV and each of V-VII; V and each of VI-VII; VI and each of VII.

The following pairwise combinations of methods involve separate searches in non-overlapping areas of subject matter: I and each of II-VII; II and each of III-VII; III and each of IV-VII; IV and each of V-VII; V and each of VI-VII; VI and each of VII.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches required are not co-extensive, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: arthritis, rheumatoid arthritis, and reactive arthritis.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 10 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1647

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
